

KALNÍKOVÁ, V., PALPURINA, S., PETERKA, T., KUBEŠOVÁ, S., PLESKOVÁ, Z. & SABOVLJEVIĆ, M. 2017. Bryophytes on river gravel bars in the Balkan mountains: new records and insights into ecology. – Herzogia **30**: 370–386.

**Supplementary Figures S3:** Figures of bryophytes and habitats.

**Fig. 1.** *Bryum klinggraeffii*, from the River Lim, Montenegro. Photo: Svatava Kubešová.

**Fig. 2.** Albania, River Drini Zi, *Myricaria germanica* shrubs, locality of *Bryum klinggraeffii*. Photo: Veronika Kalníková.

**Fig. 3.** Montenegro, River Lim, initial sparse but very species rich vegetation with juveniles of *Myricaria germanica*, plot of the *Bryum klinggraeffii* and *Dicranella staphylina* findings. Photo: Veronika Kalníková.

**Fig. 4.** The River Radika (Macedonia) – locality e.g. of *Pellia neesiana*; vegetation dominated by *Calamagrostis pseudophragmites*. Photo: Veronika Kalníková.

**Fig. 5.** Dry river channel of Crn Kamen tributary in Mavrovo National Park, Macedonia; the place where for example *Schistidium rivulare* was collected. Vegetation is represented by *Salix elaeagnos* and *Calamagrostis pseudophragmites*. Photo: Veronika Kalníková.
