

Neue Publikationen die Moosflora Mitteleuropas betreffend, Zweite Folge

JÖRG MÜLLER & J. PETER GRUBER

Die Literaturzusammenstellung erhebt keinen Anspruch auf Vollständigkeit. Sie berücksichtigt überwiegend Publikationen aus dem Jahr 2018 und beinhaltet hauptsächlich bryologische Fachbücher und Fachartikel zu Studien und Fundberichten über Moose in Mitteleuropa. Ausnahmsweise sind auch außereuropäische Arbeiten aufgelistet, die aufgrund der behandelten Arten oder Methoden eine starke Relevanz für Mitteleuropa haben. Für aktuelle Veröffentlichungen mit Fokus auf Taxonomie und Systematik sei auf den Beitrag „Taxonomische und nomenklatorische Neuerungen – Moose, Vierte Folge“ von MARKUS K. MEIER in diesem Heft verwiesen. Für Hinweise auf entsprechende Publikationen für die dritte Folge dieser Serie sind wir dankbar.
